Highlights

Multi user, multi beverage

6 one-touch beverages that can be personalised by 6 user profiles – every family member gets his or her favourite customized specialty with just one touch of a button.

Automatic milk function

With the integrated milk frother, all you have to do is filling it with milk and simply pressing the cappuccino button. Your drink will be served within seconds as creamy froth milk will be poured automatically into your beverage.

One touch interface

The wide and easy-to-read display allows onetouch-functionality and intuitive handling.

Milk and foam level selector

For an even wider selection of drinks the automatic and integrated milk frothing function with removable carafe can be set at different levels. It is therefore easy to get hot milk for a cafe latter or perfect foam for a cappuccino.

Ceramic grinders

The high-tech grinders of this coffee machine beat the competition's steel grinders on many levels: always perfectly Italian taste because of consistently accurate grinding without overheating, supreme longevity, super-silent operation.

Adjustable coffee dispenser

No matter what your favourite glass or cup is – with one movement the multi-dimensional coffee

dispenser is adjusted to its size so the full taste and aroma is always perfectly captured.

Removable brewing group

The brewing group, a Saeco invention, is the heart of our espresso machines, ensuring automation. The brewing group is, depending on the model, easily accessible from the front or side. It can be removed effortlessly for easily cleaning by rinsing under the tap ensuring maximum hygiene.

SBS (Saeco Brewing System)

Saeco automatic espresso machine exclusively allows you to adjust your espresso's intensity, altering the crema and body structure as it is dispensed. Simply by turning the knob you can prepare the crema exactly according to your taste. A little knob that makes a big difference.
