Highlights

QuickClean technology

The Philips juicer is designed for easy cleaning thanks to QuickClean technology. Cleaning can now be done within 1 minute, thanks to the integrated pulp container and smooth surfaces.

Pre-clean

Philips' unique pre-clean function allows you to quickly rinse clean your juicer between different juices or after juicing. By pouring water into the pusher, you can create a water fountain rinsing away unwanted leftovers.

Pulp in one place

Due to the round shape without nooks and crannies the leftovers are collected in the pulp container.

Juice up to 2L in one go

You can make up to 2L of juice in one go without needing to empty the pulp container.

700 W motor

Strong 700 W motor for blending, mixing and crushing effectively.

XL feeding tube

The 75 mm extra large feeding tube allows you to juice even large fruits and vegetables like apples, carrots and beetroots without pre-cutting.

Smooth and easy to clean

The juicer is designed with round shapes and smooth surfaces to facilitate easy rinsing under the tap.

See-through pulp container

Enjoy a true interactive juicing experience. The lid and the pulp container are transparent so you can see your fruits and vegetables being juiced. You also directly see when the container is full which means it is time to empty it.

Quick and easy assembly

Quick and easy assembly of all parts.
