Highlights

1.8 l detachable water tank

The water tank can be removed to be refilled easily under the tap. The large filling hole makes refilling fast. Thanks to the 1.8-l water tank capacity, you can iron for up to 2 hours continuously without any refills.

ProVelocity Steam Engine

Water is transferred from the water tank to the iron by a high-pressure pump. A lot of water travels inside the steam chamber at very high speed. This causes very powerful and constant steam to come out from the soleplate all the time, without water condensation.

Continuous steam

The more steam, the faster the ironing. The unique technology in a Philips steam generator iron generates powerful steam making ironing easier, better and faster.

Energy saving

By using ECO mode and a reduced amount of steam, you can save energy without compromising on the ironing results.

Lighter weight steam generator

Thanks to the revolutionary ProVelocity technology, we made your steam generator iron more compact than ever before. The compact steam generator fits easily on your ironing board making your ironing more convenient. In addition, your steam generator takes much less storage space.

OptimalTEMP technology

"Now you can iron from jeans to silk with no temperature setting required. Guaranteed not to burn any ironable fabrics. Revolutionary technology with the 1) Advanced Smart Control Processor which controls precisely the soleplate temperature. You do not need to

adjust the temperature 2) Compact ProVelocity steam engine delivers more steam for faster ironing. It features a compact design for easier storage"

Refill with tap water any time

Your steam generator iron is designed to use tap water. While ironing, when the water tank runs out of water, you can easily refill it without having to wait or turn off your appliance.

Safe rest

The innovative Philips OptimalTEMP technology guarantees no burns on all ironable fabrics. During ironing, there is no need to put your iron back on the base station; just leave the hot iron soleplate directly on the garments or cotton ironing board cover without an additional resting accessory. It will not damage any of your ironable garments, or the board. This makes your ironing easier, with less wrist effort.

Smart Calc cleaning system

The Smart Calc cleaning system is an integrated descaling and cleaning function that protects your steam generator iron. After around 10 hours of ironing, your steam generator iron will remind you to perform the Calc cleaning process with a sound and light notification. The iron conveniently rests on the Calc container as it collects the dirty water, so you don't have to strain to hold the iron during the process. After all the water has been collected in the container, your steam generator iron is ready to use again.

Steam ready in 2 minutes

Steam is ready to use in 2 minutes and can be refilled at any time during ironing.

Amazingly comfortable handle

The soft material finishing applied on the top of the ironing handle delivers a soft touch. The special pattern to enhance the grip makes gripping more comfortable during ironing

Max 6.5-bar pump pressure

The more steam, the faster the ironing. Powerful continuous steam is generated, which penetrates deep inside the garments, making ironing faster and better. The amount of steam can be regulated to suit your needs.

Quiet pump

Enjoy ironing with family around or while watching TV, without being disturbed by the noise of your steam generator. Quiet technology delivers quiet yet very powerful steam. The steam generator is fitted with a sound-absorbing platform to reduce the noise caused by the pump vibration while delivering the powerful continuous steam.

Philips Green Logo

Philips Green Products can reduce costs, energy consumption and CO2 emissions. How? They offer a significant environmental improvement in one or more of the Philips Green Focal Areas — Energy efficiency, Packaging, Hazardous substances, Weight, Recycling and disposal and Lifetime reliability.

Specifications

Technology

For all ironable fabrics
No burns
OptimalTEMP technology
ProVelocity steam engine
Smart Control Processor
Quiet pump

Fast crease removal

Continuous steam: Up to 120 g/min
Power: 2600 W
Pressure: Max 6.5-bar pump
Ready to use: 2 min
Steam boost: Up to 410 g
Steam-on-demand
Variable steam levels
Vertical steam

Easy to use

Safe on all ironable fabrics: Even delicates like silk
Soleplate gliding performance: 5 stars
Soleplate name: SteamGlide Plus
Detachable water tank
Hose length: 1.6 m
Power cord length: 1.8 m
Precision steam tip
Ready to use: Light indicator, Sound indicator
Refill anytime during use
Safety auto off
Soft grip
Soleplate scratch resistance: 4 stars

Scale management

Descaling and cleaning: Smart Calc Clean
Descaling reminder: Light, Sound, Yes

Storage

Carry lock: For transportation and safety
Cord storage: Velcro fix, Yes
Hose storage: Hose storage compartment
