Saeco, a Philips brand

Highlights

100% Ceramic grinders

Our grinders are made of high-tech ceramic: exceptionally hard and precise. Fresh beans are gently ground, without risk of overheating: extracting all the best flavors and aroma, delivering a superior coffee taste for at least 20,000 cups.

Removable brewing group

Efficiency and ease of use were key inspirations when Saeco invented the first brewing group 30 years ago. And to this day, it still proves to be an inspired, resolute piece of technology. As always, it's so simple to clean – just remove it and wash it under the tap for a few seconds, then re-insert it just as easily.

Fine-tune the coffee's flavor

When it comes to the fineness of the grind, this machine never fails to satisfy. Different coffee blends

require different levels of granularity for the full flavor to unfold. So the grind granularity of this machine has eight adjustable settings – from the finest grind for a full-bodied espresso, to the coarsest for a lighter coffee

Refine crema and body quality

Enjoy a crema layer just the way you like it and discover a wide spectrum of tastes, all with the twist of a knob! You control the coffee flow and brew pressure to vary the body and thickness of the crema with one easy move. Turn it left for a luxurious, thick crema layer and an intense and full bodied espresso; Or turn it right for a smooth, lighter tasting coffee with less crema.

Customize and save your cup

Each cup will be shaped exactly to your taste. The ultimate customisation feature lets you personalise and memorise all your drinks down to the finest detail. And as there's 6 user profiles to fill, everyone using the machine can claim their cup of perfection.

Specifications

Design

- Color: Stainless steel

Finishing

- Material drip tray: Stainless steel
- Material water tank: Plastic
- Material boiler: Stainless steel (Inox)
- Material of main body: Stainless steel

Country of origin

- Made in: Italy
