HIGHLIGHTS

SPECIFICATIONS

Intensive coffee aroma

Water is crucial for every espresso so it's most important to have it professionally filtered. The Gaggia Intenza+ co-developed with Brita does this very easily and conveniently prevents limescale buildup. The result: perfect water conditions for most intensive espresso aroma.

Adjustable filter settings

The water filter settings can be adjusted to the hardness of your water. Simply turn the adjustment ring on the Intenza+ water filter. Set it to A for soft water areas, B for medium water hardness (factory setting) or C for hard water. This will ensure optimal limescale protection and best taste.

Efficient brewing process

The water filter ensures a constant brewing temperature and consistent pressure during the

brewing process, enhancing your espresso machine's performance.

Reduces lime-scale

The INTENZA+ water filter helps protect your machine against the build-up of limescale from tap water, which affects the taste and aroma of your coffee.

Longer lifetime

The water filter extends the lifespan of your espresso machine, ensuring you can enjoy the best-tasting coffee for longer.

Click & go system

The water filter cartridge easily clicks into the water tank and is ready to use in less than 30 seconds.
