

Highlights

PowerChop technology

PowerChop technology is a combination of blade shape, cutting angle and inner bowl that provides a superior chopping result for both soft and hard ingredients. It is also perfect for making purées and mixing your cake batters!

40% larger feeding tube

The new Philips Daily collection Food Processor comes with a feeding tube that is 40% larger than the previous HR7625 model, saving time on pre-cutting fruits and vegetables

Dishwasher-safe accessories

All accessory parts of your Philips food processor can be put on the top rack of your dishwasher for easy cleaning.

Break-resistant jar

A 1.75 litre break-resistant jar has a working capacity of 1 litre for up to up to 5 smoothie portions at once.

Powerful processing

This Philips Food Processor offers a powerful motor providing power and control to prepare all your favourite recipes.

The perfect tool for whipping, whisking or emulsifying eggs or whipped cream. For best volume increase and fluffiness, use the low speed setting. Creating delicious desserts or mayonnaise has never been easier!

No mess from centre of bowl

Unlike other cheaper food processors, this Philips Food Processor lacks an inner chimney shaft in the middle of the bowl. This means that soups and other liquids won't leak from the middle of the bowl, keeping your food processor and kitchen counter clean! It even makes assembling your appliance much easier – simply click your tool holder in place in the bowl, guided by the form fitting couplings.

2 speed settings and pulse

For best results, use the low speed setting (speed 1) to whip cream, beat eggs, create pastries and bread dough. The higher speed setting (speed 2) is well suited to chop onions and meats, blend soups and smoothies or shred, slice, grate or rasp vegetables.
