Highlights

5-steps adjustable grinders

When it comes to the fineness of the grind, this machine never fails to satisfy. Different coffee blends require different levels of granularity for the full flavor to unfold. So the grind granularity of this machine has five adjustable settings - from the finest grind for a full-bodied espresso, to the coarsest for a lighter coffee.

100% Ceramic grinders

Our grinders are made of high-tech ceramic: exceptionally hard and precise. Fresh beans are gently ground, without risk of overheating: extracting all the best flavors and aroma, delivering a superior coffee taste for at least 20,000 cups.

A hot coffee in no time

Enjoy perfectly hot, coffee without the wait, thanks to the powerful boiler with Saeco Thermospeed technology. The Thermospeed technology will flash-heat the coffee circuit when the machine is turned on and prevents the loss of heat ensuring perfect, hot coffee from the very first cup.

Customize and save your cup

Each cup will be shaped exactly to your taste. The ultimate customisation feature lets you personalise and memorise all your drinks down to the finest detail. And as there's 6 user profiles to fill, everyone using the machine can claim their cup of perfection.

Effortless clean with 1 finger

The Saeco GranBaristo is the only fully automatic espresso machine to offer a brewing group that can be removed using just one finger for an effortless cleaning.

Unique variety of drinks

The Saeco GranBaristo offers an unparalleled variety of drinks to suit any occasion thanks to the patented VariPresso brewing chamber. The secret is in the adjustable brewing pressure; set it on high for an intense, rich espresso, or lower the pressure for a long, classic coffee.

Specifications

Sustainability

- Power consumption brewing: 1900 W

General specifications

- Cups at the same time: 2
- Suitable for: Whole coffee beans, ground coffee powder
- Type of carafe: Basic carafe
