Highlights

Supreme Quality Coffee

The coffee experts of Tchibo Cafissimo only use sealed aroma capsules. Tchibo offers a wide choice of flavor profiles, with 8 aromatic classics, from mild to strong and from elegant to full-bodied. In addition you can also discover four single-origin coffees from the best growing regions of Brazil, Ethiopia, Colombia and India, which are from 100% sustainable sources like all the coffee variety.

Coffee variety

Triple pleasure of Espresso, Caffè Crema and Filter Coffee. Thanks to the combined patented high & low pressure brewing system, which automatically adjust for the most suitable pressure, the highest for espresso, middle for caffè crema and low pressure for filter coffee.. Cafissimo machines can brew strong Espressos and milder Caffè Cremas as well as black Filter Coffees from just one machine to enjoy your favorite coffee at any moment of the day.

Save your favorite lenght

We have automatically set the recommended amount for each beverage: 125ml for Caffè Crema and Filter Coffee and 40ml for Espresso. However you can always re-programme the settings to suit your taste, so your machine prepares coffee just the way you like it.

Intuitive operation

The color of the backlit beverage buttons hints the right type of capsule needed for each beverage. White for Espresso, Yellow for Caffè Crema and Blue for Filter Coffee. This makes your machine reliable and easy to use for coffee enjoyment.

Fits your favourite cup

The drip tray can be set at two different positions to best fit your favourite cup, from a small Espresso cup of 85 mm to a tall Latte Macchiato glass of 135 mm. Adjusting the

brewing height to the ideal setting also guarantees the best layer of crema every time.

Less maintenance

The large 0.7 liter water tank allows you to brew multiple drinks before refilling. You could brew up to 5 consecutive Caffè Cremas for example. Refilling and cleaning couldn't be easier, thanks to the easily removable water tank.

Automatic capsule ejection

Your spent capsule is automatically ejected into the integrated capsule container when you lift the lever after brewing a cup of coffee. The container can collect up to 7 used capsules.

Quick and easy descaling

The Alert LED turns orange when it is time to descale. Once the descaling mode is activated, the control panel will guide you through the process of descaling your machine in about 30 minutes.

Specifications

Features

- Removable watertank

Design

- Colour: White
- Materials and finishing: Thermoplastic and Metal

Weight and dimensions

- Waste container capacity: up to 8 servings
- Product dimensions (L x D x H): 150x360x265 mm
- Maximum cup height: 140 mm
- Water tank capacity: 0.7 L
- Packaging dimensions (LxDxH): 226x391x358 mm
- Product weight: 4 kg

Energy saving

- Energy saving: Automatic stand-by

Country of origin

- Made in: Romania
