Space-saving 2-in-1 design

- 2-in-1 sterilizer design

Highlights

Compact 2-in-1 sterilizer

Efficiently sterilize your bottles and accessories, by putting teats, caps and soothers in the included small basket. The sterilizer also has a slender design that won't take up much space.

Sterile for up to 24 hours

The sterilizer will keep its contents – baby bottles, breast pumps etc – sterile for up to 24 hours if the lid is unopened.

Fast sterilization

The sterilizing cycle lasts approximately 10 minutes, after which it switches off automatically.

Spacious design

The sterilizer has a compact design yet cleverly fits up to 5 Philips Avent baby bottles at once.

Works across bottle types

The sterilizer is suitable for use with both standard neck and wide neck baby bottles. It also fits other baby products like breast pumps and accessories.

Multi-function lid design

The sterilizer's lid has been cleverly designed so that it can be hung on the side of the sterilizer after use or used to take out and stand the baby bottles and other products on.
