

Philips NanoProtect Filter Series 3 FY3430/FY4440

The NanoProtect S3 filter can effectively capture particles as small as 3nm, including common allergens, dust, pollution, bacteria & some virus. It can also absorb formaldehyde and TVOC. The high grade filter with firm and stable structure ensures all the air flows through the filter and delivers high filtration efficiency.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the six Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.

Packaging

- Cardboard: minimal of 90% recycled content
- No use of polyvinylchloride (PVC), extruded polystyrene (EPS) in packaging

Substances

- The product is free of PVC (excluding the power cord)
- The product is free of brominated flame retardants (BFR)

- The passport applies to FY2122/00
