- Large 2.5 l fully visible water tank

Carefree ironing, no temperature setting required

- Safe to leave the hot soleplate on the ironing board
- Iron everything from jeans to silk with no temperature setting required

PHILIPS

Highlights

Steam ready in 2 minutes

Steam is ready to use in 2 minutes and can be refilled at any time during ironing.

Easy De-calc

Ultra-long-lasting steam performance: Philips' exclusive Easy De-Calc function provides the ideal way to get rid of limescale and extend the lifetime of your steam generator iron. Your iron will remind you to de-calc with light and sound. When your appliance is cold, simply open the Easy De-Calc knob and collect the dirty water and limescale in a cup.

Refill with tap water any time

Your steam generator iron is designed to use tap water. While ironing, when the water tank

runs out of water, you can easily refill it without having to wait or turn off your appliance.

Steam boost up to 240 g

The steam boost can be used for vertical steaming and tough creases.

New SteamGlide soleplate

The new SteamGlide soleplate is the best Philips soleplate. Is extremely scratch resistant, glides excellently and is easy to clean.

Energy saving

By using ECO mode and a reduced amount of steam, you can save energy without compromising on the ironing results.

2.5 l fully visible water tank

The extra-large 2.5 L water tank ensures up to 3 hours ironing without any refilling. It makes your ironing faster and easier. Thanks to the clear water tank, you can see the water level from any angle and make sure you still have enough water to steam efficiently.

Safe rest

The innovative Philips OptimalTEMP technology guarantees no burns on all ironable fabrics. During ironing, there is no need to put your iron back on the base station; just leave the hot iron soleplate directly on the garments or cotton ironing board cover without an additional resting accessory. It will not damage any of your ironable garments, or the board. This makes your ironing easier, with less wrist effort.

Specifications
