

Philips Café Gaia coffee maker

The Café Gaia coffee maker brings excellent coffee, in our iconic design. The thermal jug maintains the full aroma and temperature for more than 2 hours*. Fill the water tank easily and precisely with the water level indication. After brewing your coffee, the coffeemaker switches off automatically for energy saving and safety.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the six Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.

Energy

- Max power consumption: 1000W
- Annual energy consumption: 82kWh**
- Standby energy consumption: 0 W
- Automatic shut off: yes
