Introducing Philips IntraSight on a mobile platform

Uniting today's best-in-class imaging and physiology tools on a secure applications based platform with a modern, intuitive interface, suited to both coronary and peripheral environments.

Series 5 displayed

TSM tableside control

Philips allows you to run an entire case without breaking scrub. With our intuitive user interface and new touch screen module (TSM), you get total control within the sterile field. Run an entire case tableside as you quickly navigate, annotate and measure to your exacting specifications, all with the ease and responsiveness of using a tablet, even when wearing gloves and under a sterile drape.

Configurations	Series 3	Series 5
IntraSight Mobile - interventional applications platform	•	•
Imaging (IVUS) license (includes digital, rotational and ChromaFlo IVUS)	•	•
Physiology license (includes iFR hyperemia free lesion assessment modality and FFR modality)		•
Touch Screen Module (TSM)	Optional	•
Philips Remote Services	•	•
Windows 10	•	•

“IntraSight has made an immediate impact in our lab. It’s so simple and intuitive to use that it took us no time at all to get used to it. It has made using physiology and imaging even quicker and easier which is a great advance for us and for our patients.”

- Dr. Rasha Al-Lamee, Imperial College London, Hammersmith Hospital
