

Philips 3000i Series  
Air Purifier and Humidifier

Purifies rooms up to 80 m<sup>2</sup>  
310 m<sup>3</sup>/h clean air rate (CADR)  
600 ml/h humidification rate  
Connected with CleanHome+  
app

AC3829/60

## Breathe the difference

Removes 99.97% of particles down to 0.003 microns

Visualise and control your air - anywhere, anytime. This 2-in-1 air purifier and humidifier balances its two functions to perform in rooms up to 80 m<sup>2</sup> against allergens, dry air discomfort, harmful gases, particles, bacteria and viruses.

### Effortless control

- Track and control with the app
- Low energy consumption

### Seamless operation

- AeraSense accurately senses and displays air quality
- Thoroughly tested for quality you can trust
- Sleep mode with ultra-quiet operation
- 2-in-1 and purifier-only settings with auto and manual modes

### Superior performance

- Up to 310 m<sup>3</sup>/h CADR (1): purifies rooms up to 80 m<sup>2</sup> (2)
- HEPA filter removes 99.97% of particles of 0.003 µm (3)
- Removes up to 99.9% of viruses and aerosols from the air
- NanoCloud technology: hygienic humidification without fuss
- Automatic humidification up to 600 ml/h with 4 settings

# PHILIPS

## Air Purifier and Humidifier

Purifies rooms up to 80 m<sup>2</sup> 310 m<sup>3</sup>/h clean air rate (CADR), 600 ml/h humidification rate, Connected with CleanHome+ app

# Highlights

### Advanced Purification

The key performance indicator of a purifier is CADR (Clean Air Delivery Rate): the clean airflow generated in 1 hour. The higher CADR, the faster the cleaning. The dirtier the room, the higher the CADR must be. This purifier has a CADR of 310 m<sup>3</sup>/h (1) and it can effectively purify a whole room of up to 80 m<sup>2</sup> (2).

### 99.97% particle removal

3-layer filtration with a NanoProtect HEPA filter, an active carbon filter and a pre-filter captures 99.97% of ultra-fine particles as small as 0.003 microns (3), so you are safe from PM2.5, bacteria (4), pollen, dust, pet dander, gas and other pollutants.

### Up to 99.9% virus removal

Captures aerosols including those which may contain respiratory viruses. Tested independently by Airmid Healthgroup to remove up to 99.9% of viruses and aerosols from the air (5).

### NanoCloud Technology

NanoCloud technology humidifies the air quietly and effectively with up to 99% less bacteria (6). NanoCloud works by natural evaporation to create an invisible mist of nano-sized molecules of pure water vapour. Due to their fine size, they humidify the air evenly and it's extremely difficult for bacteria and minerals to attach to them, preventing bacteria spread and white dust in your room (7).

### Automatic humidification

Quickly humidifies the air with up to 600 ml/h (8) of water humidification rate. It senses the humidity level in the air and automatically humidifies to the desired level. Choose 40%, 50%, 60% or 70% as your target humidity level, and the humidifier will automatically turn on or off to reach the desired humidity level.

### AeraSense sensors

AeraSense sensor scans the air 1000 x a second and displays air quality in your home at

AC3829/60

a glance. The display shows the level of allergens and PM2.5 in numerical form, as well as with an intuitive colour ring.

### Quality you can trust

Philips purifiers go through 170 mandatory and strict inspection tests before being released from the factory. They are subjected to rigorous life and durability tests, for continuous operation 24/7.

### Ultra-quiet operation

In Sleep mode, display lights are dimmed, and the purifier operates in near silence for clean air while you sleep. Certified by Quiet Mark.

### Automatic and manual modes

Switch between 2-in-1 and purifier-only modes at the touch of a button. In automatic mode, the sensors intelligently choose the right speed for your home. Run your purifier in any of the automatic modes (general or allergen), sleep mode or choose from 4x speed levels: Speed 1, 2, 3 and Turbo – to be fully in control of the airflow and sound level.

## Air Purifier and Humidifier

Purifies rooms up to 80 m<sup>2</sup> 310 m<sup>3</sup>/h clean air rate (CADR), 600 ml/h humidification rate, Connected with CleanHome+ app

# Specifications

### Energy efficiency

- Max. power consumption: 45 W
- Stand-by power consumption: < 2 W
- Voltage: 220-240 V

### Air quality display

- AeraSense technology
- Air quality feedback: Colour ring, numerical
- Particle level (PM2.5)
- Indoor Allergens Index (IAI)
- Humidity level

### Connectivity

- App, connects via Wi-Fi: Clean Home+
- Smartphone compatibility: iPhone and Android devices

### Replacement filters

- Active Carbon: FY2420 - Up to 12 months
- Humidifier Wick: FY3435 - Up to 6 months
- NanoProtect HEPA: FY2422 - Up to 24 months

### Weight and dimensions

- Dimension of packaging (L x W x H): 485\*389\*803 mm
- Weight of product: 11.45 kg
- Weight incl. packaging: 13.59 kg
- Dimension of product (L x W x H): 416\*280\*679 mm

- Colour(s): White
- Water tank: 4 L

### Service

- 2-year worldwide guarantee

### Performance

- Filtration: HEPA, Active Carbon, Prefilter
- CADR (Particle, GB/T) (1): 310 m<sup>3</sup>/h
- Humidity rate (8): 600 ml/h
- Particle filtration (3): 99.97% at 0.003 microns
- Virus and aerosol filtration (5): 99.9%
- VitaShield technology
- Allergen filtration (10): 99.97%
- Humidification room size (9): Up to 80 m<sup>2</sup>
- NanoCloud technology (6): Up to 99% less bacteria
- Purification room size (2): Up to 80 m<sup>2</sup>

### Usability

- Automatic modes: General and Allergen
- Cord length: 1.8 m
- Sleep mode
- Humidity settings: 40%, 50%, 60%, 70%
- Manual speed settings: 1, 2, 3, Turbo
- Mobility: 4-wheel
- Child lock
- Timer: 1-12 hour(s)

AC3829/60

[www.philips.com](http://www.philips.com)

- \* CADR: tested by third party according to GB/T 18801-2015
- \* Room size: Calculated according to GB/T18801-2015.
- \* Humidification rate: Tested by GB/T 23332 in Philips internal climate chamber, 2017. Chamber size 25 m<sup>3</sup>, initial temperature of 20±2°C and relative humidity of 30±3%RH.
- \* Tested on the filter media with NaCl aerosol, classified at 3 nm according to DIN71460-1, in 2017 by third-party test lab.
- \* Tested on the filter media with 1 pass efficiency at 5.33 cm/s airflow, in 2017 by third-party test lab.
- \* Bacteria reduction: Tested by Shanghai Institute of Measurement and Testing Technology (SIMT) in a 30-m<sup>3</sup> chamber according to GB21551.3-2010, (Staphylococcus albus) 8032 as testing bacteria
- \* Microbial Reduction Rate: Test conducted at Airmid Healthgroup Ltd. Tested in a 28.5-m<sup>3</sup> test chamber contaminated with airborne influenza A(H1N1).
- \* Generates nano-sized water molecules, prevents spreading bacteria. Results are based on emission of the bacterium Staphylococcus Albus (a simulant for a relevant pathogen) directly from clean units and clean wick filters, using sterilised water spiked with said bacterium.
- \* Measurements were conducted after 20 g was released from the units into a sealed 30-m<sup>3</sup> chamber. Bacteria introduction into the air in the room depends on many factors such as room size and configuration.
- \* Prevention of spreading white dust or wet spots: Independent third-party test Determination of deposition of minerals from liquid droplets on furniture, according to DIN 44973, IUTA e.V. To determine mineral deposits onto furniture from airborne liquid droplets over a period of 3 hours.
- \* Professional-grade sensor: Benchmark with Grim sensor and comparison with industry infra-red sensor.
