Washable motor filter

The kit contains 1 x washable motor filter. This provides high filtration levels and prevents fine dust from reaching the motor and damaging it. The filter can be washed. It is recommended to replace the filter once a year.

Washable 2 layer foam filter

The kit contains 1 x motor inlet filter (2 layer foam). This filter is providing additional protection to the motor and should be placed next to the washable motor filter. The filter can be washed. It is recommended to replace the filter once a year.

Exhaust filter

The kit contains 1 x exhaust filter. The filter catches even the finest dust before the air is expelled back into the room. This results in a clean, dust-free air in your home. The filter should be replaced once a year.
