Highlights

Removes more plaque between te

Removes more plaque between teeth

Better gum health

Sonicare AirFloss is clinically proven to improve gum health in just two weeks.

Helps prevent cavities

By gently bursting away plaque that brushing missed, Sonicare AirFloss helps prevent cavities from forming in the spaces between your teeth.

Fresh & clean with mouthwash

Fill the reservoir on the handle with either mouthwash or water, then point and press. Use with mouthwash for the ultimate fresh experience and anti-microbial benefits.

Up to 2 weeks of mouth wash

No more need to deal with daily handle spilling from a bottle or worry about spills. The Fill and Charge station holds several weeks of mouth wash to simplify your daily routine.

Fills in less than 10 seconds

When you dock your handle, the Fill and Charge station quickly fills the handle with mouth wash. No more juggling bottles and worrying about spills.

30 Second Clean

With the AirFloss, cleaning your entire mouth takes just 30 seconds. Simply press the button once for a single burst, then move and repeat. To use the new auto-burst feature, hold down the button and move the guidance tip from space to space. It will automatically burst every second.

Micro-droplet technology

Our clinically-proven results are possible from our unique technology that combines air and mouthwash or water to powerfully yet gently clean between teeth and along the gumline.

Keeps your handle charged

The Fill and Charge station keeps your docked handle charged and also works with many Philips Sonicare toothbrush handles as well.
