Highlights

AeroSeal nozzle

The AeroSeal nozzle captures more dust and fluff per stroke thanks to the special designed soleplate. It gently opens up the carpet to remove the dust deep down. Thanks to the optimal sealing the dust is transported into the cyclone with maximum airflow.

Easy to empty dust container

The dust container is carefully designed to dispose collected dirt without creating a dust cloud. It is one-hand operated and thanks to its unique shape and smooth surface, you can easily control the emptying of the dust container.

2100 Watt motor

This powerful 2100 Watt motor generates max. 370 Watt suction power for excellent cleaning results.

10 m action radius

10 m action radius for cleaning with less effort.

PowerCyclone 5 Technology

PowerCyclone 5 technology maximizes airflow and performance by separating dirt from air in one go. It delivers remarkable cleaning results through highly efficient steps: 1) Air enters fast into the PowerCyclone thanks to the air inlet design. 2) The curved airpass quickly accelerates the air in the cyclonic chamber to separate the dust from the air. 3) The optimized exit blades separate dirt from the cyclone and into the dust bucket.
