2-pack Standard size, Click-on, BrushSync enabled

Highlights

Angled bristles

Benefit from our best plaque removal¹ regardless of your brushing style. The Premium All-in-One brush head has precisely angled bristles which are engineered to maximize its plaque-removing potential.

Rounded profile

The curved profile helps bristles to go exactly where they need to. Through rigorous development we have created an all-in-one experience that delivers exceptional oral care.

Triangular tips

Gently brush away stains with triangular tips designed to remove stains more effectively than rounded bristles. The shape allows more contact with the surface of your teeth to remove stains effectively.

Longer bristles

The brush head's extra-reach side bristles gently brush your gum line even when you are focusing on your teeth. The bristles also flex to help compensate for any excess pressure.

Trusted sonic brushing

Brush away plaque with sonic technology – our benchmark in effective and gentle cleaning. While you brush, up to 62,000 bristle movements and dynamic fluid action help clean even hard-to-reach areas, leaving your mouth feeling exceptionally fresh and clean.

Designed by experts

This all-in-one brush head is the product of our most extensive research and development ever. We combined knowledge from dental professionals, experts in oral care, engineers

HX9092/65

and designers to bring this holistic brush head to life.

Easy to use

The A3 Premium All-in-One brush head fits perfectly with your Philips Sonicare click-on handle (please see the list below). Simply click on and off for easy replacement and cleaning.

Brush head replacement

Brush heads become less effective after 3 months of use, but with BrushSync you'll be reminded before this happens. Your BrushSync enabled toothbrush understands your usage and notifies you when it's time for a replacement.
