- Integrated anti-leak valve & flip top design prevent spills

Highlights

Healthy development

Learning to drink independently is a key step in a child's development. We support children's journey towards independent drinking, helping to enable an easy transition from breast or bottle to open cup. Learning from health care professionals, our different solutions with teats, soft and hard spouts, straws and 360° drinking rims follow the development of your child and stimulate his newly acquired motor and drinking skills. Our premium quality solutions are of course BPA-free and developed with convenience and hygiene in mind.

Ideal for active toddlers

The 10oz cup is the perfect size to keep your child hydrated throughout day and during active times. The flip top design keeps straw clean when out and about. The cup's contoured shape and anti-slip texture make it easy to hold and grip for small toddler hands, enabling your little one to confidently develop independent drinking skills.

Bent straw for easy drinking

The lower part of the straw is bent so that the straw easily reaches the liquid which allows you to drink in a natural drinking position.

Anti-leak valve and flip top

The straw has an integrated anti-leak valve to prevent spills. The flip top protects the straw and prevents leakage on the go.

Easy to clean and assemble

The Philips Avent Bendy straw cup can be easily assembled and disassembled. All parts are completely dishwasher safe, for your convenience.

BPA free

The Philips Avent Bendy straw cup is made from completely BPA free materials.

Philips Avent compatibility

All Philips Avent bottles and cups are compatible excluding the glass bottles and the Grown-up cups. So you can mix and match to create the perfect cup, suiting your toddler's individual development needs.

Healthy oral development

The Philips Avent Bendy straw cup allows healthy oral development and exercises mouth muscles, building oral strength.* Developed with experts to make it our best straw cup possible.*
