## Sonic electric toothbrush

Built-in pressure sensor 3 modes, 3 intensities, 2 x BrushSync features, Travel case

HX6471/03

# Highlights

### Makes teeth brighter

The soft, flexible bristles of the Philips Sonicare ProtectiveClean are designed to curve around the contours of your teeth, giving you 4x more surface contact\*\* and up to 10x more plaque removal from hard-to reach spots.

### Safe brushing experience

A good electric toothbrush for braces. The Sonicare ProtectiveClean 6100 can also be used on fillings, crowns, veneers and other sensitive orthodontics.

### Customize your brushing

Three modes. Three intensities. Customize your brushing to your cleaning preferences with the Sonicare ProtectiveClean 6100. Clean mode is standard for superior cleaning. White is the ideal mode for removing surface stains. And Gum Care mode adds an extra minute of

reduced-power brushing, so you can gently massage your gums.

### BrushSync for the right mode

Switching brush heads for a different style of brushing? No problem. The base of your Sonicare 6100 recognizes the type of head it is connected to and automatically adjusts to the correct intensity mode for the brush.

### Prioritizes your oral hygiene

Your brush head and base will sync-up to remind you when it's time to replace the head with a simple short beep and a handle light.

### Monitor your brushing pressure

Brushing too hard can damage your teeth and gums. To prevent this, your Philips Sonicare ProtectiveClean emits a gentle pulsing sound to remind you to ease off on the pressure.

### Sonicare 6100 — a deeper clean

Sonic technology pulses water between your teeth and gums to break up and remove 3x as much plaque along the gumline than a manual toothbrush.

### BrushSync technology

A microchip-enabled technology that detects and synchronizes the smart brush head with the smart handle. The smart handle and smart brush head pair is a powerful combination that enables Smart mode pairing and Smart replacement reminders.

### Smart functionalities

With a gentle pulse reminds you to change to a new part of your mouth, and signals when 2 minutes of brushing time is up. This sonic electric toothbrush gives you the most optimal brush, every time.
