Pacifier

Highlights

Lets baby's skin breathe

Extra-large airholes ventilate your baby's skin keeping it dryer while soothing.

98% teat acceptance*

When we asked parents how their little ones respond to our textured, silicone nipples, an average of 98% said that their baby accepts the Philips Avent ultra soft and ultra air soothers.

Long lasting glow-in-the-dark

Use ultra air's glow in the dark button to find your baby's pacifier quickly without having to switch on the lights.

Nipple made of 100% silicone

We choose consciously for silicone material for our ultra soft and ultra air nipples, since it's a safe and inert material, widely used in medical applications, free of hazardous chemicals, endocrine active substances (e.g. BPA) and allergens.

Orthodontic nipple

Our orthodontic, symmetrical soft silicone nipples are designed for natural oral development.

Natural feel for baby

Our textured silicone nipple is designed to mimic the feel of mom's breast.

Sterilize in 3 minutes

The travel case that comes with our ultra soft and ultra air pacifiers doubles as a sterilizer. All you need to do is add some water and pop it in the microwave. Then rest easy that it's clean for the next use.

Produced in the Netherlands

Our ultra soft and ultra air pacifiers are designed and produced in the Netherlands.
