Personalized coaching

Smart brushing sensors
3 modes, 3 intensities
2 brush heads & UV Sanitizer

HX9192/02

Smart brushing. Superior results.

Up to 10x more plaque removal and healthier gums*

FlexCare Platinum Connected takes the guesswork out of oral care. Sensors send your brushing data to the Sonicare app via Bluetooth® wireless technology, providing you personalized coaching and feedback for the most complete clean possible.

Track your brushing with real-time guidance

- Alerts you when you're brushing too hard
- Teaches you to reduce your scrubbing
- Track and improve your coverage

Sonicare app delivers personalized feedback

- A second chance to clean the spots you miss with TouchUp
- Always know the effectiveness of your brush head
- Start taking better care of any trouble areas
- The coaching you need to refine your routine

Philips Sonicare's deepest, most complete clean

- A customized brushing experience
- Contours to teeth and gums for a deeper clean
- Designed to fit your lifestyle
- Dynamic cleaning action for better oral health
- Timer helps encourage thorough brushing

Highlights

Location sensor

FlexCare Platinum Connected's location sensor shows where you're brushing too little for better coverage. If there are spots you consistently miss when you're brushing, the location sensor will bring them to your attention.

Pressure sensor

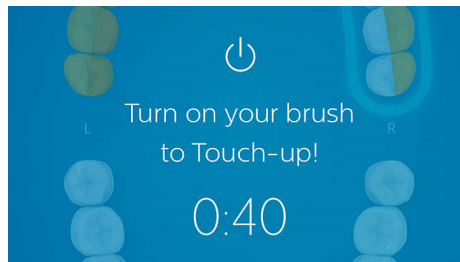

You might not notice if you're brushing too hard, but your FlexCare Platinum Connected will. If you apply too much pressure, the intuitive pressure sensor will make the toothbrush handle gently pulsate so you know exactly when to adopt a softer touch. In studies, 7 out of 10 aggressive brushers successfully reduced their brushing pressure thanks to the pressure sensor.

Scrubbing sensor

With an electric toothbrush you let the toothbrush do the work, rather than using a scrubbing motion. FlexCare Platinum Connected has a scrubbing sensor that helps guide you to reduce scrubbing for optimized technique and a more gentle clean.

Touch Up

If you happen to miss any spots during a brushing session, the Philips Sonicare app tracks your coverage and gives you the opportunity to go back for a second pass. TouchUp provides customized guidance based on your personal brushing data so you can immediately address any missed areas and achieve a more complete clean.

Personalized coaching

Want to start a new goal?
Here are some we recommend for you:

Gum health
[Learn more >](#)

FlexCare Platinum Connected lets you set daily goals and track your progress. The Sonicare app

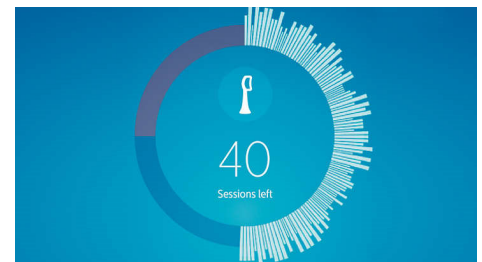

maintains a running history of your brushing data, so you can easily review your performance. With personalized coaching, tips and alerts from the app, your brushing technique will improve over time. You can even share your progress report with your dental professional.

Focus areas

If your dental professional identifies specific spots in your mouth that need more attention due to plaque buildup, gum recession or another issue, FlexCare Platinum Connected can help you tackle those trouble areas. You can highlight these spots in your personalized mouthmap within the Sonicare app, reminding you to give them the extra care they need each time you brush.

Brush head performance monitor

Over months of normal use, brush heads gradually wear down and lose their stiffness. The Sonicare app includes a smart brush head performance monitor to track your brush head effectiveness based on your actual brushing time and pressure. It tells you when to replace your brush head so you continue to get the best results. You even have the option to order replacement brush heads right from within the app.

Specifications

Design and finishing

- Color: White

Connectivity

- Bluetooth® wireless technology: Connected brushing app

Power

- Voltage: 110-220 V

Technical specifications

- Battery: Rechargeable
- Operating time (full to empty): Up to 2 weeks
- Battery type: Lithium ION

Service
