SCD630

Always close to your baby

Private and secure with A-FHSS technology

The Philips Avent SCD630 enables you to maintain a secure and private connection with your baby at all times. Hear your baby with perfect sound quality and also see your baby in crystal clear vision (3.5" LCD), whether it is day or night.

Private and secure connection

- High resolution 3.5" screen with crystal clear night vision
- Energy saving eco mode with connection indication
- Hear your baby with clear sound
- Private, secure connection with adaptive FHSS technology

Freedom, flexibility, comforting & soothing

- Excellent operating time for overnight monitoring
- Choose the best sound level for your surroundings
- Range up to 300 meters*
- Comforting night light and lullabies to calm your little one
- Vibration mode for subtle notifications
- Stay connected with talk back

Reliability and reassurance

- 3 sound level lights and a link indication light
- Monitor the temperature in your baby's room

Highlights

Private, secure & adaptive FHSS

Unique handset pairing for a private, secure connection to your baby. Combined with the new Adaptive FHSS (Frequency Hopping Spread Spectrum) technology for minimal interference.

3.5" color screen with 2x zoom

See your baby, day and night, with crystal clear infra-red night vision that automatically switches on in the dark. Enjoy your baby sleeping with the high resolution, extra large 3.5" color screen. With 2x digital zoom and pan for extra reassurance so you can see everything your baby is up to.

Perfect clear sound video

Hear every tiny giggle, gurgle, and hic-up with perfect clarity. Not only see but also hear your baby anytime with high quality, crystal clear sound.

ECO mode

Switch on the ECO mode to reduce power consumption during quiet times in the baby room while still knowing you are connected to your baby via the unique link indication. The ECO mode switches off the audio/video transmissions and the units only connect when the baby makes a sound.

Sound level lights and link

Three sound level lights to indicate the level of sound in your baby's room even when the parent unit is muted. With the link indication you always know when your monitor is in range and connected. The parent unit will alert you when your monitor is out of range or when the power is low, helping you make sure that you are always connected to your baby.

Temperature sensor

The temperature sensor with customized alert allows you to monitor the climate in your baby's room. Your baby can't regulate its body temperature as well as you can and a slight change in temperature can make your baby restless. A customized temperature sensor will immediately alert you, through the digital display on the parent unit, if the climate in your baby's room changes.

300m Range

Indoor range up to 50 meters*, Outdoor range up to 300 meters*.

Operating time up to 10 hours

The convenient rechargeable parent unit will give you the freedom of cordless monitoring for up to 10 hours before re-charging is required.

Night light and lullabies

There's nothing like a gentle lullaby and a warm tranquil glow of a night light to calm a restless baby. From any room in the house you can select one of 5 relaxing tunes and switch on the night light, helping your baby to drift effortlessly to sleep in no time.

Talk back

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home.

Vibration alert

Personalize your alert settings and get notified by a silent and subtle vibration of the parent unit.

Sensitivity control

It allows you to set the microphone sensitivity of the baby unit. The microphone sensitivity determines what noise level the baby unit picks up, e.g. you will want to hear when your baby cries, but you may be less interested in its babbling.

Specifications

Tuner/Reception/Transmission

Frequency band: 2.4GHz
