

Philips PulseRelief
4 Self-adhesive electrodes

For use with PulseRelief

4 electrodes
Patented hydrogel technology
Easy magnet connection

PR3827/00

Muscle and Joint pain relief

Self-adhesive electrodes

Philips self-adhesive electrodes have patented hydrogel technology for multiple application to the skin. There are 4 in a pack, and each are recommended for up to 20 uses. The electrodes are easily connected to the TENS Units by a magnet.

Patented hydrogel technology

- Patented hydrogel technology for multiple use

Magnet for easy connection

- Easy magnet connection to connect TENS Units with electrodes

Optimized for multiple use

- Can be used for several treatment sessions, up to 20 times

PHILIPS

4 Self-adhesive electrodes

For use with PulseRelief 4 electrodes, Patented hydrogel technology, Easy magnet connection

PR3827/00

Specifications

What's in the box

- Self-adhesive electrodes: 4 pcs
- Self-adhesive electrodes size: 50 x 50 mm
- Multistick® hydrogel
- Plastic seal bag

Composition of hydrogel

- Glycerin, non-tallow: (Cas. No.: 56-81-5)
- Water: (Cas. No.: 28062-44-4)
- Poly(acrylate) Co-polymer: (Cas. No.: 7732-18-5)

Highlights

Multiple use

Our electrodes use a high quality patented hydrogel technology for multiple application to the skin. The electrodes are flexible so they can be applied on irregular body contours.

Reusable up to 20 times

Can be used for several treatment sessions (up to 20 times) on different body parts. The number of times the electrodes can be used is dependent on skin type and usage. The electrodes can easily be stored in their original plastic package for next time use.

Easy snap-on connection

The TENS units are easily connected to the self-adhesive electrodes by a magnet. First, apply the self-adhesive electrodes to your body and then just snap-on the TENS units via a magnet connection.
