

Philips AVENT Giftsets

Our unique AirFree vent is designed to draw air away from the nipple keeping it full of milk, even when the bottle is horizontal. Reducing the amount of air your baby ingests help with common feeding issues such as colic, reflux, and gas.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.

Energy

- Annual energy consumption <35kWh/year*
- Standby power: 0 Watt

Packaging

- Cardboard: Forest Stewardship Council (FSC) mix certified material
- No use of polyvinylchloride (PVC) in packaging
