- Distributed in hospitals nationwide
- Supports natural oral development

Convenient design promotes stronger bond with baby

- Also available with Snuggle, a friendly companion for baby
- Unique design helps parents bond with baby
- Design prevents water from getting trapped in the nipple

Highlights

Used in hospitals

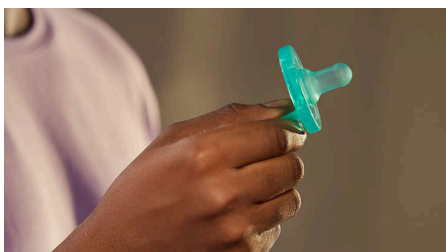

Trusted by medical professionals to calm newborns. The Philips Avent Soothie is distributed in hospitals nationwide.

100% medical grade silicone

Made entirely from flexible, medical grade silicone, this Soothie is specially-created for newborns of 0-3 months. Its one-piece design adheres to the American Academy of Pediatrics guidelines.**

Symmetrically-shaped nipple

Soothie supports the natural oral development of your baby. Its collapsible nipple with a symmetrical shape respects your baby's teeth and gums.

Finger-held solution

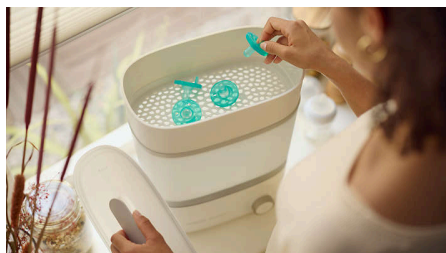

It's uniquely designed so that you can place your finger in the nipple. This helps you create an even stronger bond with your baby by helping them suckle. It's also a lovely way for other caregivers to connect with the baby, making it easier to share the care.

Compatible with Snuggle

Soothie is also sold with Snuggle, a plush toy that helps babies find, hold and love their Soothies. Snuggle makes it even easier for your baby to find comfort, so they can rest easily and so can you. The Soothie and plush toy detach so the parts can easily be cleaned separately.

Easy to clean

Thanks to its unique finger-held design, drops of water don't get trapped in the nipple. For extra hygiene, simply use your sterilizer or submerge it in boiling water.**

** American Academy of Pediatrics recommends to "purchase pacifiers that cannot possibly come apart. Those molded of one solid piece of plastic are particularly safe". (Caring for Your Baby and Young Child: Birth to Age 5, 7th ed. 2019, By American Academy of Pediatrics, Tanya Remer Altmann and David L. Hill, New York: Bantam Books.)

*** For hygiene reasons, replace pacifiers after 4 weeks of use
