# Highlights

## SilentSeal nozzle

The SilentSeal nozzle contributes to an optimal performance in both low noise and dust and fluff pick up. It is optimally sealed for efficient airflow resulting in best cleaning performance - made by WesselWerk.

## Aerodynamic air channel

The air channel has been finetuned to make sure the air slides a smooth way out that minimizes noise creation. Additionally a special motor suspension reduces vibrations.

## New 1250 Watt HD motor

Highly efficient 1250 Watt HD (High Density) motor generates max. 400 Watt suction power, which means that it uses 30% less energy with the same cleaning result as a 2000 Watt appliance.\*

## HEPA AirSeal, HEPA 13 filter

## HEPA AirSeal & HEPA 13 filter

This Philips vacuum cleaner has been designed in such a way that all the air taken in is passed through the washable HEPA 13 filter (99.95% filtration) before it is exhausted. No escape is possible.

## Comfortable carrying handles

This vacuum cleaner has not one, but two carrying handles. When it is on its wheels, there is a handle on top which enables you to easily move the cleaner around with very little bending. The second handle on the front side of the appliance enables you to comfortably carry it around in an upright position.

## ECARF Seal of Quality Award

This ECARF certified vacuum cleaner guarantees with 99.95% certainty that almost all the air in the room will be filtered along with the normal vacuum action. This removes almost all allergens from carpets, furniture, and other spaces in your house.
