- Follows the curves of your baby's face for enhanced comfort
- One-piece design, made from 100% medical grade silicone

Easy to clean

- Design prevents water from getting trapped in the nipple

Used by medical professionals

- Distributed by hospitals in the USA*

Symmetrical-shaped nipple

- Supports natural oral development

Fingerheld solution

- Unique design helps you bond with your baby

Highlights

Comfortable design

The special curved, heart-shaped shield is designed to follow the natural curves of your baby's face, so as to provide maximum comfort without bumping into his or her tiny nose.

100% medical grade silicone

Made entirely from flexible, medical-grade silicone, this Soothie has a firmer silicone material specially-created for babies of 3-18 months. Its one-piece design adheres to the American Academy of Pediatrics guidelines.*

Used in hospitals

The Philips Avent Soothie range is widely distributed by American hospitals. It is trusted by doctors and nurses to soothe newborns*.

Symmetrical-shaped nipple

Soothie Heart supports the natural oral development of your baby. Its collapsible nipple – with a symmetrical shape – respects your baby's teeth and gums.

Fingerheld solution

It's uniquely designed so that you can place your finger in the nipple. This enables you create an even stronger bond with your baby, by helping them suckle.

Compatible with pacifier clips

Attach most common pacifier clips with thin string to the hole on the front tab*. You can also attach it to our Snuggle toy, by placing the tab through the similar-shaped hole in the Snuggle's mouth. That's a good way to make sure your Soothie can be quickly found.

Easy to clean

Thanks to its unique fingerheld design, drops of water don't get trapped in the nipple. For extra hygiene, simply use your sterilizer or submerge it in boiling water.*

* All our Soothies have same nipple shape, one-piece design and material, and come with a variety of shield shapes, including those distributed in US hospitals
* American Academy of Pediatrics recommends to "purchase pacifiers that cannot possibly come apart. Those molded of one solid piece of plastic are particularly safe". (Caring for Your Baby and Young Child: Birth to Age 5, 7th ed. 2019, By American Academy of Pediatrics, Tanya Remer Altmann and David L. Hill, New York: Bantam Books.)
* For hygiene reasons, replace pacifiers after 4 weeks of use
* Warning: Do not tie pacifier around child's neck as it presents a strangulation danger
