Highlights

Experiencing sensitivity?

For ongoing take-home sensitivity treatment, recommend replacing existing toothpaste with a toothpaste containing 5% potassium nitrate and use twice daily. If additional sensitivity relief is needed, Relief ACP should be used before each whitening treatment.

Formula designed for patients

Philips Zoom NiteWhite offers a variety of custom professional whitening options designed specifically to fit your patients' whitening needs.

From first-time whitening to touch-ups, Zoom provides your patients with a unique selection of formulations that are sure to help them get the smile that they always wanted. Customised for your patients and applied in the comfort of their own home, Zoom NiteWhite is the only custom take-home option that helps protect enamel, provides your patients with advanced sensitivity relief, as well as improves lustre and shine for the best possible whitening experience.
