## The display

### 'Notification' symbol

The shaver is equipped with a notification symbol. This symbol lights up when important advice is available in the app. Go to the app to obtain this advice. It reminds you to unplug the shaver before you switch it on and to clean it for optimal performance. It also reminds you to replace the shaving heads every two years or the cleansing brush every three months.

### Attachment detection feature

When you have paired your iPhone with the shaver, the attachment detection feature is activated. Every time you switch on the shaver, this feature automatically recognizes the attachment (shaving unit/cleansing brush) that is attached to the shaver handle and adapts the settings accordingly. Unpairing of your iPhone and the shaver deactivates this feature.

### Manually select attachment

Make sure your shaver is connected to your iPhone. The SkinAnalyst app also offers the possibility to (de)activate the Attachment detection feature. You can do this by going to My profile, My shaver and switching off the Auto attachment detection. You can then manually select the brush attachment, by switching on the shaver and press and hold the on/off button for one second.

### Shaving unit detector

### Bluetooth®

The shaver is equipped with Bluetooth 4.0 to connect your shaver to the app on your iPhone. Bluetooth is automatically activated when you switch on the shaver for the first time. You can only deactivate it by switching on the travel lock.

### Travel lock

## Preparing for use

### Pairing the shaver and your iPhone

For this shaver a special app is available. You can download the SkinAnalyst app from the App store. By using the app, your skincare and shaving routine will be personalized. The app gives you expert advice based on your skin, shaving method, local weather conditions, etc. to support your daily skincare and shaving routine.

**Note:** The app is available for iPhone 6, iPhone 6 Plus, iPhone 6S and iPhone 6S Plus equipped with iOS9 or higher.

To create a secure and safe connection, first the shaver and your iPhone need to be paired once.

- 1** Download the SkinAnalyst app from the App store.
- 2** Make sure Bluetooth on your iPhone is switched on.
- 3** Open the app on your iPhone.
- 4** Follow the instructions in the app. After you have filled in the skin assessment, the app asks you to pair your iPhone with the shaver.
- 5** Switch on the shaver. Bluetooth is activated automatically.

- 6 In the app, the pop-up message 'press pair' appears. When your iPhone and the shaver have been paired successfully, the Bluetooth symbol flashes briefly and then goes out. If this does not happen, please see 'Troubleshooting'.
- 7 Once the shaver and the app have been paired, the shaver automatically selects the right personal settings depending on the attachment you have clicked on. During shaving or cleansing, you can open the app to see the settings you are using and the duration of the shaving or cleansing session.

Note: When you use the shaver, keep your iPhone and shaver within transmission range (no more than 5 meters from each other, in the same room).

As an extra reminder, the notification symbol flashes every 9 treatments, without a connection between the shaver and the app, to tell you to connect with the app.

- 1 Open the app and make sure you are close to the shaver.

Use the rotating cleansing brush with your daily cleansing cream. The cleansing brush removes oil and dirt, contributing to a healthy and oil-free skin. We advise you to use it no more than twice a day. It is recommended not to use the cleansing brush directly after shaving to prevent skin irritation. For better shaving results, use the cleansing brush before shaving.

**Caution: Do not use the shaver on damaged or irritated skin or on wounds.**

1 Attach the cleansing brush to the shaver ('click').

- 2** Moisten the cleansing brush with water.

Note: We advise you to not overdo the cleansing and to not cleanse any zone longer than 15-20 seconds.

**9** After the treatment, rinse and dry your face. Your face is now ready for the next step of your daily skincare routine.

Note: Hold the shaving head holder in your hand when you reinsert the shaving heads and reattach the retaining rings. Do not place the shaving head holder on a surface, as this may cause damage to the shaving heads.

- 7** Attach the shaving head holder to the bottom part of the shaving unit ('click').
- 8** To reset the replacement reminder, press and hold the on/off button for approx. 7 seconds.
