Съвет

Ако косата ви е боядисана или трайно къдрена, използвайте по-ниска температура в рамките на препоръчаните диапазони. Ако използвате спрей за гъвкава фиксация, което е силно препоръчително, може да намаляте препоръчаната температура с още 10°C.

Изберете по-кратко време за къдрене в рамките на препоръчаните диапазони, ако искате свободно падащи, естествени на вълн, мектури и вълни и по-дълго време в рамките на диапазона - ако искате стегнати, добре оформени къдрици.

Времето за захранване се показва от мигащите цифри за температура.

Когато индикаторът за температура започне да свети постоянно, косата е готова за ползване.

Ако бутоните на уреда не са използвани в продължение на 5 секунди, захранването на бутоните се активира автоматично и се показва иконата „Заключени бутони“ (⑩) (първото автоматично заключване след включване на уреда е след 15 секунди).
