How do I charge my appliance?

Charge the appliance before you use it for the first time and when the bottom light of the battery status indicator flashes orange, indicating that the battery is almost empty.

Charging takes approx. 1 hour.

Quick Charge: After approx. 5 minutes of charging, the battery contains enough energy for one shave. When the appliance is fully charged it has a cordless operating time of up to 60 minutes.

Note: You cannot use the appliance while it is charging.

Charging with the supply unit

- 1 Make sure that the appliance is switched off.
- 2 Insert the small plug into the appliance and put the supply unit in the wall socket.
 - While the appliance is in quick charge mode, the lights of the battery status indicator light up one after the other. After approximately 5 minutes, the bottom light of the battery status indicator flashes. The battery now contains enough energy for one shave.
 - While the appliance charges, first the bottom light of the battery status indicator flashes and then lights up continuously. Next the second light flashes and then lights up continuously, and so on until the appliance is fully charged.
 - When the appliance is fully charged, all three battery indicator lights light up continuously. After approx. 30 minutes, the light goes out automatically.
- 3 After charging, remove the supply unit from the wall socket and pull the small plug out of the appliance.

Charging in the charging stand (specific models only)

- 1 Make sure the appliance is switched off.

- 2 Put the small plug in the charging stand and put the supply unit in the wall socket.

How do I use my appliance and the attachments?

Warning: Always check the appliance and all accessories before use. Do not use the appliance or any accessory if it is damaged, as this may cause injury. Always replace a damaged part with one of the original type.

Note: This appliance is waterproof. It is suitable for use in the bath or shower and for cleaning under

the tap. For safety reasons, the appliance can therefore only be used without cord.

Shaving

You can use this appliance either wet or dry, or even under the shower. For a wet shave, apply some water and shaving foam or gel to your skin and rinse the shaving heads under the tap with warm water before following the steps below.

- 1 Switch on the appliance.
- 2 Move the shaving heads over your skin in circular movements to catch all hairs growing in different directions. Make sure each shaving head is fully in contact with the skin. Exert gentle pressure for a close, comfortable shave.

Note: Do not press too hard, as this can cause skin irritation.

Note: If you are shaving with gel or foam, rinse the shaving unit regularly during your shave to ensure that it continues to glide smoothly over your skin.

- 3 Use the narrow sides of the shaving unit to shave in hard-to-reach areas such as along your jawline and under your nose.
- 4 Switch off and clean the appliance after each use.

Note: Make sure you rinse all foam or shaving gel off the appliance.

Skin adaptation period

Your first shaves may not bring you the result you expect and your skin may even become slightly irritated. This is normal. Your skin and beard need time to adapt to any new shaving system. To allow your skin to adapt to this new appliance, we advise you to shave regularly (at least 3 times a week) and exclusively with this appliance for a period of 3 weeks.

Cleaning reminder

When you switch off the appliance, the cleaning reminder flashes to remind you to clean the appliance.

- Clean the appliance and attachments after each use to prevent clogging and damage (see 'How do I clean my appliance and the attachments?').
- Clean the shaving heads thoroughly once a month or when the appliance does not shave as well as it used to (see 'Thorough cleaning').

Trimming

You can use the trimmer to groom your sideburns and moustache.

- 1 Push the trimmer release slide downwards to open the trimmer.
- 2 Switch on the appliance.

- 3 Hold the trimmer perpendicular to the skin and move the appliance downwards while you exert gentle pressure.
- 4 You can also use the trimmer under your nose.
- 5 Switch off the appliance and clean the trimmer after each use to prevent clogging and damage (see 'How do I clean my appliance and the attachments?').
- 6 Close the trimmer.

Using the click-on attachments

Note: The accessories supplied may vary for different products. The box shows the accessories that have been supplied with your product.

Using the beard styler attachment with comb

You can use the beard styler attachment with the comb attached to style your beard at one fixed setting or at different length settings. You can also use it to pre-trim any long hairs before shaving for a more comfortable shave.

The hair length settings on the beard styler attachment correspond to the remaining hair length after cutting and range from 1 to 5 mm.

- 1 Twist the shaving head or other attachment to remove it from the handle and press the beard styler attachment onto the handle.

- 2 Slide the comb straight into the guiding grooves on both sides of the beard styler attachment.

- 3 Press the length selector and then push it to the left or right to select the desired hair length setting.
- 4 Switch on the appliance.

- 5 Move the appliance upwards while you exert gentle pressure. Make sure the front of the comb is in full contact with the skin.
- 6 Switch off the appliance and clean the attachment after use.

Using the beard styler attachment without comb

You can use the beard styler attachment without the comb to contour your beard, moustache, sideburns or neckline to a length of 0.5 mm.

You can use the beard styler attachment with the comb attached to style your beard at one fixed setting or at different length settings. You can also use it to pre-trim any long hairs before shaving for a more comfortable shave.

- 1 Pull the comb off the beard styler attachment.

Note: Grab the comb in the center to pull it off the beard styler attachment. Do not pull at the sides of the comb.

- 2 Switch on the appliance.

- 3 Hold the beard styler attachment perpendicular to the skin and move the appliance downwards while you exert gentle pressure.
- 4 Switch off the appliance and clean the attachment after use.

Using the nose/ear trimmer attachment

You can use the nose/ear trimmer attachment to trim your nose and/or ear hair.

Trimming nose hair

Make sure both the nose/ear trimmer attachment and nasal passages are clean before trimming.

- 1 Twist the shaving head or other attachment to remove it from the handle and press the nose/ear hair trimmer onto the handle.
- 2 Switch on the appliance.
- 3 Carefully insert the trimming head into one of your nostrils.

Do not insert the attachment more than 0.5 cm into your nostrils.

- 4 Slowly move the trimming head around inside each nostril, making sure the side of the tip is held firmly against the skin. This reduces the tickling effect that can occur.
- 5 Switch off the appliance and clean the attachment after use.

Dried nasal mucus can block the cutting element, preventing the appliance from switching on. If the cutting element is blocked, clean the attachment (see 'How do I clean my appliance and the attachments?').

Trimming ear hair

Make sure your outer ear channels are clean and free from wax.

- 1 Switch on the appliance.

- 2 Slowly move the trimming head along the rim of the ear to remove hairs that stick out beyond the rim.
- 3 Carefully insert the trimming head into the outer ear channel.

Do not insert the trimming head more than 0.5 cm into your ear channel, as this could damage the eardrum.

- 4 Slowly turn the trimming head around to remove all unwanted hairs from your outer ear channel.
- 5 Switch off the appliance and clean the attachment after use.

Storage and travel

Note: We advise you to let the appliance and its attachments dry before you store them for the next use.

- Put the protection cap (if supplied) on the shaver to protect it from dirt accumulation.
- Store the appliance in the pouch (if supplied).
- Alternatively, store the appliance on the charging stand (if supplied) or in the Philips Quick Clean Pod (if supplied).

Travel lock

You can lock the shaver when you are going to travel to prevent it from switching on accidentally.

Press the on/off button for 3 seconds to use the travel lock mode.

When the travel lock is activated, the travel lock symbol flashes.

Press the on/off button for 3 seconds.

Once the travel lock is deactivated, the appliance switches on automatically.

Note: The shaver unlocks automatically when it is connected to a wall socket.

How do I clean my appliance and the attachments?
