- 3 heat & 3 timer settings for different types of curls
- Automatic feedback with curl ready sound
- Barrel cleaning accessory to keep the tool clean and smooth

Care for your hair

- Prevents static for smooth, frizz free, shiny hair
- For gentle rolling of hair

Highlights

Sensing

Its active digital sensor measures the temperature of your hair more than 36,000*** times per styling session to give you a tailor-made experience every time you style.

Adapting

The intelligent microprocessor is the brain behind SenseIQ. It constantly analyzes and adjusts the temperature. Adapting its heat to your hair, the autocurler prevents overheating, while always providing the curling performance you expect.

Smart curling system

Glamorous, lasting curls at the touch of a button. The curl boost technology curls every hair strand like a professional stylist. Salon results from the comfort of your own home.

Caring

Your hair deserves the best care. Thanks to the Philips Auto Curler your hair finally gets it. Our unique system preserves 95% of your hair's natural strength** while locking in 3x more moisture***. For strong, healthy-looking hair with bounce and shine.

Longer curling barrel

This auto curler has a unique open design with a longer curling barrel. You can now style twice as much hair in each go*.

Smart curl guards

Our unique smart curl guards create glamorous and lasting curls. They rotate to follow the flow of your hair, while gently wrapping it around.

Ionic care

Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is smooth, shiny and frizz-free.

Ultra smooth curling surface

The ultra-smooth curling barrel is designed to let hair glide within it. No friction. No piling. Just gorgeous curls, effortlessly.

Settings for different styles

From soft waves to bouncy curls. We guarantee that every choice will be a glamorous one. Choose the temperature (170°C - 190°C - 210°C), time (12sec - 10sec - 8sec) and curl settings to achieve your desired look every time.
