- 27 setting combinations for different looks
- 3 heat & 3 timer settings for different hair types
- 3 adjustable curling directions

Care for your hair

- Natural flowing open design for perfect curls, stress-free
- Protective ceramic coating with keratin infusion
- Curl boost technology: great result at a caring heat setting

Highlights

Smart curling system

Enjoy ultimate styling experience with our smart curling system. The innovative system is a great package of many upgraded features. Fabulous, lasting curls are created at a touch of a button with two auto-rotating smart curl guards. They curl every hair strand like a professional stylist all the while caring for your hair. The clever curl boost technology allows the auto curler to create lasting results at a more caring temperature setting. The device's longer barrel, easy vertical grip and open design that follows the natural flow of your hair help you style perfectly with little effort.

Longer barrel for 2x more hair

With our auto curler's 113% more curling surface*, you can now style 2x more hair in one go. Perfect curls just got easy and fast.

Vertical grip for easy use

The auto curler is held in a natural vertical position with a relaxed grip, making it effortless to create perfectly consistent curls all around your head. The operating buttons are positioned where your grip is so that you can

intuitively reach it. The curved, feminine shape of the curling chamber makes it comfortable to curl even closer to your scalp.

Smart curl guards

Our auto curler creates perfect fabulous curls that last, every time. Thanks to our innovative smart curl guards, hair is perfectly wrapped around the barrel like the masterful touch of a professional hairdresser. Because each strand of hair is curled evenly at the controlled temperature, the result is perfect each time. The best thing is that this highly skillful work is done only at a touch of a button, automatically!

27 styling options for variety

Enjoy variety of looks with 27 setting combinations (3 timer settings x 3 temperature settings x 3 curling direction settings). The various curl, temperature and time settings can be used in different combinations to achieve your desired look every time.

Natural flowing open design

Our innovative open design in combination with two vertical curling guards help you achieve great curls while caring for your hair. In the spacy chamber, the rotating curl guards

gently and smoothly wrap hair around the curling barrel with no stress. Because the curl guards are shaped vertically, following the natural flow of your hair, there is less chance of jamming the hair. Style with peace of mind.

Keratin ceramic

Protective ceramic coating with keratin infusion for better care of your hair.

Curl boost technology

Our clever curl boost technology enables great, lasting curls at a caring temperature setting. The combination of the shape, smart curl guards and the keratin ceramic barrel work in sync to effectively use the heat, so hair is styled perfectly every time.

3 heat & 3 timer settings

The 3 temperature settings (170°C - 190°C - 210°C) and 3 timer settings (12sec - 10sec - 8sec) help you achieve great results from loose to tight curls on different hair types. For example, the high temperature setting with the extra curling time will shape the curls tighter - ideal for thicker hair. The low temperature setting combined with shorter curling time is optimal for hair that needs extra hair protection.
