# Highlights

## ActiveRelease technology

Philips Nutri wonder plate covers feature ActiveRelease technology - a cutting edge innovation, five years in development. Each plate cover is made of a special blend of advanced polymers and powerful natural oils with Vitamin E. The ingredients are preserved inside the plate covers and only by the power of the straighteners' heat are gradually released on to the hair to nourish it, giving you cashmere soft and radiant finish\*.

## Natural ingredients

Nutri wonder brings together a lightweight blend of ingredients used for centuries by women around the globe. The formula has been carefully crafted to suit all hair types.

CAMELLIA OIL is a great source of Omega 3, 8 and 9. It's traditionally used for protection and miniaturization of hair. ARGAN OIL is a powerful mix of Vitamins E, F and other vital nutrients. It's well known for its antioxidant and nourishing properties. AVOCADO OIL is rich in Vitamins A, D, E and proteins. It is famous for its nourishing and moisturizing effect on hair.

## Heat protection

Nutri wonder straightens with the utmost care. The oils releasing plate covers shield your hair from the direct heat so your hair can stay strong. They have smooth surfaces to minimize the friction and respect the health of your hair. When the plate covers are placed correctly the 'Care' sign will appear on the display to signal that the straightener is ready to nourish, protect and straighten your hair.

## Replace the covers every month

Each set of plate covers lasts one month with average use, which is 10 straightening sessions. When the delicate flowery aroma and decorative design on top of the plates fades, it's time for new ones.

## Straighten with/without cover

You can choose to style your hair with or without covers, thanks to floating ceramic plates.

## Easy cover release

Covers are easy to insert and detach thanks to release sliding buttons on the side of the straightener.
