

PHILIPS

Conical Curler

Care CurlControl

13-25 mm

HP8618/40

Healthier way to perfect curls and waves thanks to the Curl Ready Indicator

Hyper sumptuous, soft curls radiating shine. Voluptuous, chic waves with lots of volume and thickness... With the new Philips conical curler Care CurlControl you can create different curling styles with no compromises on hair care

Beautifully styled hair

- Conical barrel for different types of curls and waves
- 200°C top temperature for perfect styling results

Less hair damage

- Unique indicator lets you know when your curl is ready
- SilkySmooth ceramic coating is twice as smooth on your hair
- Digital settings let you adjust the curler to your hair type

Ease of use

- Automatic shut-off after 60 min
- Safety stand for easy use
- Universal voltage
- Key-lock function to avoid unintentional switching
- Ready to use indicator on LCD screen

Highlights

Safe usage

Some hair straighteners and curling irons have been equipped with an automatic shut-off feature. This feature has been designed to provide peace of mind. If left on, the appliance will automatically switch off after 60 min.

Safety stand

The safety stand enables you to put the curler down safely during use.

Conical shape of barrel

With the conical curler (Ø13-25 mm) you can create different types of curls and waves: from tight ringlets to loose, natural looking curls and waves. It is fast and easy, no more kinks. Add volume to your hair by creating variations on the theme of curls!

SilkySmooth ceramic coating

The SilkySmooth ceramic barrel, which is twice as smooth as ceramic barrel, ensures less friction and smoother hair release for shinier, healthier hair.

Key-lock function

You are always in control. No more accidental temperature change with the key-lock function.

Digital settings

Digital settings allow you to choose the temperature (130 - 200°C) and the curling time (5, 8, or 10 seconds) that suit your hair type and desired look.

Curl Ready indicator

Unique Curl Ready indicator lets you know when your curl is ready by giving a “beep” signal. This innovative feature helps you get beautiful curls and waves while helping prevent hair overtreatment. Just choose one of three curling times and press the button after having wrapped the hair around the barrel. Refer to user manual to see recommendations of our hair experts on how to select a curling time depending on your hair type and the look you want to achieve.
