- Cool shot sets your style

Professional results

- Powerful 2100 Watt motor
- Ceramic diffuser for additional protection and volume

Prevents damage

- Ceramic element with far-infra red heat prevents overdrying
- Ion conditioning for frizz-free, shiny hair

PHILIPS
sense and simplicity

Specifications

Technical specifications

- Voltage: 220 V
- Frequency: 50/60 Hz
- Wattage: 2100 W

Serviceability

- Replacement

Highlights

Ceramic element

The ceramic element prevents overdrying. It issues infra red heat, which is a gentle warmth that helps to protect the hair from overdrying, without compromising on speed and effectiveness.

Ion conditioning

The ioniser inside the hairdryer creates negative particles, called ions, that neutralise the positive charge hair usually has. This calms the individual strands, brings them back into balance, and removes any static. As a result, hair is smoother and more manageable, and stays perfectly in style.

9 heat/speed settings

9 heat/speeds settings provide maximum flexibility to dry and pre-style your hair the way you want.

2100 Watt professional performance

The combination of heat and superior airflow brings you the quickest way to dry your hair.
