Professional titanium plates for straightening Straightener with floating titanium plates

Philips Pro straightener offers the best a straightener needs: titanium floating plates with best heat conduction for fast straightening with optimal pressure. A 10sec heat-up time for immediate straightening and digital temperature control

Beautifully styled hair

- Titanium coated plates for fast and smooth straightening
- More care with ion conditioning for shiny, frizz-free hair

Less hair damage

- Prevent hair breakage with floating plates
- Faster, yet more caring with high-performance heater
- Digital temperature settings for absolute control

Ease of use

- 100mm long plates for fast and easy straightening
- Instant heat-up time of only 10 sec.
- Salon approved 2m cord length
- *2-year warranty plus 3 years, upon online registration

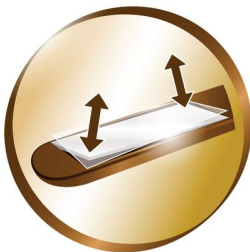

Highlights

Titanium coated plates

Professional titanium coated plates for best heat conduction. This superior plate material is durable and transfers heat quickly, resulting in fast and smooth straightening.

Floating Straightening Plates

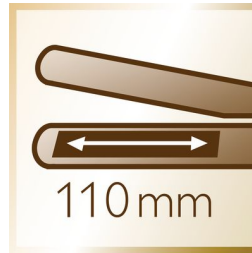

The floating plates move, when too much pressure is applied during straightening. This protects the hair shaft from being damaged and therefore avoids overall hair breakage.

Ionic Care

Give your hair an instant care with ionic conditioning. Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is beautifully shiny, smooth and frizz-free.

Long professional plates

The longer 100mm plates enable better contact with the hair to help you achieve perfect straightening results easier and in less time.

10 sec. heat-up time

The high-performance heater used in combination with the titanium plates, enables an instant heat-up time of only 10 seconds. Switch it on and you are ready to start straightening.

Digital temperature settings

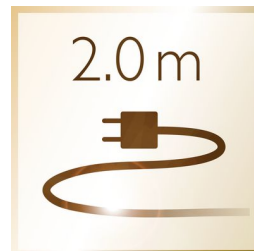

Easily set and style your hair with variable temperature settings from 140 to 230°C. The unique combination of the temperature setting wheel and digital display gives you precise control for professional results.

High-performance heater

This straightener keeps a more constant temperature and therefore constant results. Thanks to its high-performance heater it allows you to straighten your hair at a more caring temperature while getting the exact style you want! Your styling will be faster, since you need less strokes, while straightening.

2m cord

The salon approved long cord length of 2m results in improved flexibility and ease of handling, so you can use it anywhere you want.

5 Year warranty*

This product has been thoroughly tested to deliver professional performance, and a long-lasting guarantee of 5 years.
