- Vertical grip for easy use

#### Care for your hair

- Keratin ceramic for smooth and protected hair
- MoistureProtect technology preserves hair's natural moisture
- Designed to prevent hair trapping
- Ionic care for smooth, frizz-free, shiny hair

# Highlights

## Smart curling system

Glamorous, lasting curls at the touch of a button. The curl boost technology curls every hair strand like a professional stylist. Salon results from the comfort of your own home.

## Longer curling barrel

This auto curler has a unique open design with a longer curling barrel. You can now style twice as much hair in each go and be ready in half the time\*.

## MoistureProtect technology

MoistureProtect technology controls and adapts the temperature to boost shine and to preserve your hair's natural moisture. Protects your hair from overheating by always ensuring the optimal temperature. Enjoy beautiful hair protected inside and out.

## Ionic care

Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is smooth, shiny and frizz-free.

## Keratin ceramic

Keratin is one of your hair's most essential ingredients, which ensures strong, healthy and gorgeous looking hair. The ceramic curling barrel is enriched with keratin for smooth gliding and protection during styling.

## Design prevents hair trapping

Thanks to a unique combination of our open design, smooth barrel and intelligent sensor, you can create effortless curls without having to worry about hair trapping. The intelligent sensor pauses the device when it detects that too much hair is inserted or not inserted properly. The innovative open and upright design allows you to immediately take your hair out. The smooth and sealed barrel prevents friction, while also caring for your hair. Style with ultimate peace of mind.

## Smart curl guards

Our unique smart curl guards create glamorous and lasting curls. They rotate to follow the flow of your hair, while gently wrapping it around the curling barrel. Each strand is curled evenly at a controlled temperature, giving you perfect results every time. It really is like having your own personal stylist at home.

## 27 styling options

From soft waves to bouncy curls. We guarantee that every choice will be a glamorous one. Choose the temperature, time and curl settings to achieve your desired look every time.

## Automatic feedback

This auto curler provides you with automatic feedback. The curl ready sound indicates when your curl is ready by making continuous beeping signals. This innovative feature helps you create great long-lasting results every time while also protecting and caring for your hair.
