Highlights

ThermoProtect anti overheating

The ThermoProtect temperature setting provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

Powerful

This Philips Thermoprotect hairdryer creates 2200W for a fast and strong airflow. The resulting combination of power and speed makes drying and styling your hair quicker and easier.

Accurate control

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure full control for precise and tailored styling.

11mm narrow concentrator

The slim styling nozzle concentrate the flow of hair through the 11mm opening for precision styling on specific areas. Great for touch ups or to set your style.

Volume and curls

The volume diffuser spreads the flow of air across the hair, boosting volume and reducing frizz while drying. For best results, hold the diffuser close to the crown and root area. The diffuser's fine textured pins will add volume, maximize thickness, bounce and will help to shape your curls.

Cool Shot

A must-have professional function for hair stylers. The Cool Shot button provides an intense burst of cold air. It is used after styling to finish and set the style.

1.8m cord

Convenient to use thanks to the 1.8m power cord length.

Easy storage hook

A rubberized hook can be found on the base of the handle. Use to store easily at home or if staying at a hotel.
