Less Hair Damage

- Less overheating with Even Heat Distribution technology
- ThermoProtect temperature setting

Easy to use

- Three flexible settings for more control

PHILIPS

Dryer
1600W

Highlights

Shine Ionic Care

Efficient anti-static, Ion conditioning for shiny, frizz free hair.

Advanced EHD technology

Advanced Philips EHD technology means that your dryer uses a uniquely designed air outlet to ensure heat is always distributed very evenly - even at high temperatures - and prevents damaging hot spots. This gives ultimate protection to the hair from overheating and thus helps to keep your hair healthy and shiny.

ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

1600W for gentle drying

This 1600W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

Three flexible settings

The speed and heat required can be easily adjusted to create the perfect end result. Three flexible settings ensure precise and tailored styling.

Volume diffuser

The volume diffuser dries hair healthily, reduces frizz and increases volume by spreading the airflow across the hair. It adds lift and maximises volume, especially when used on the crown and root area, making it perfect for creating curls and bouncy styles
