BHA840/00

Curly or straight styles with air curl technology

The new auto-curling airstyler comes with a unique curling attachment for beautiful curls, a paddle brush for a naturally straight hair and with a nozzle for gentle drying. A caring drying & styling experience for versatile looks.

Beautifully styled hair

- 3 different attachments for multiple styles and volume
- Automatic air curl attachment creates waves and soft curls
- Paddle straightening brush for naturally straight looks
- Narrow concentrator for focused airflow
- 800W styling power for beautiful results
- Cool shot to set your style

Care for your hair

- Prevents static for smooth, frizz free and shiny hair
- Protective ceramic coating

Easy to use

- Two curling directions setting for different looks
- The airstyler is compact and fits better in your hand
- Three flexible heat and speed settings for more control
- Swivel cord to prevent tangled wires

Highlights

Versatile looks

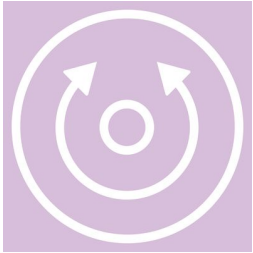

3 different attachments for multiple styles and volume

Air curl attachment

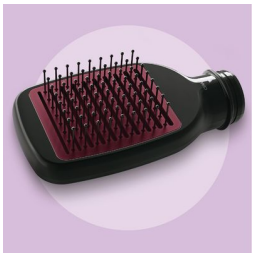

After you have dried your hair 80%, place a strand of hair on the opening of the air curl attachment. At a touch of a button, your strand of hair disappears into the curling chamber where it is dried and styled. A beautiful brushed out curl is released, for a gorgeous, natural look.

Two curling directions

The airstyler can create inward or outward curls, making it easy to handle and create a variety of styles.

Paddle straightening brush

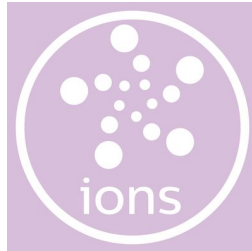

With the innovative paddle straightening brush you can create beautiful naturally straight looking hair, without causing any damage to the hair.

Narrow concentrator

The concentrator of the airstyler works by focusing the airflow through the opening, onto specific areas, enabling a gentle drying experience. Recommended for pre-drying the hair and preparing it for styling.

Ionic care

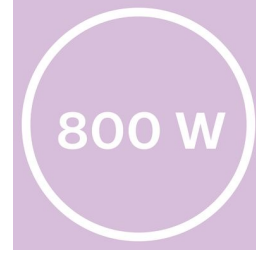

Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is smooth, shiny and frizz-free.

Ceramic

Protective ceramic coating for better care of your hair.

800W

The Air Styler with 800W airflow for a gentle drying and styling. Achieve beautiful results every day.

Cool air setting

A cool air setting allows you to fix your style or to dry hair at relatively low temperature to minimize damage.

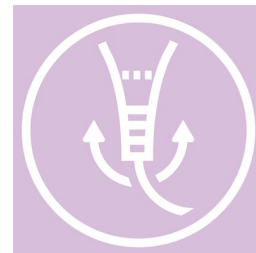

Compact design

With an ergonomic design and a smaller handle size, the airstyler allows for an easier and more comfortable user experience.

Three heat and speed settings

Three flexible heat and speed settings for more control

Swivel cord

Useful swivel cord technology rotates the cord to prevent tangled wires.
