## Dry & style natural looks with care

Dry & style at once - the new Philips ProCare airstyler allows you to create beautiful natural styles, whilst providing maximum care to your hair. The innovative Paddlebrush helps you create a naturally straight look without damage.

### Beautifully styled hair

- 1000W for beautiful results
- 38mm thermo brush to smoothen your hair
- Retractable bristle brush for easy curling
- Narrow concentrator for focused airflow
- Three flexible heat and speed settings for easy control
- Volumizer for more volume at the roots
- Paddle straightening brush for naturally straight looks

### Less Hair Damage

- More Care with ion conditioning for shiny, frizz-free hair
- Best drying temperature with ThermoProtect temperature
- Cool air setting for gentle drying
- Ceramic coated brushes for more care
- Less overheating with Even Heat Distribution technology

# Highlights

## 1000W

This 1000W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

## 38mm thermo brush

The thermo brush has an extra wide diameter of 38mm. The width of the barrel makes it the perfect styling tool for creating smooth styles and waves.

## Retractable bristle brush

This easy to use airstyler is both a styling brush and curler in one. The bristles retract into the brush at the touch of a button, so you can easily slide the styler out of your hair. What's left is a beautiful bouncy curl.

## Ionic Care

Ionic conditioning enables anti-static drying. Charged negative ions eliminate static hair, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is smooth and frizz-free hair that shines beautifully.

## Narrow concentrator

The concentrator works by focusing the flow of air through the opening onto specific areas. This results in precise styling and is great for touch-up or to finish a style.

## ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

## Cool air setting

A cold air setting is a low heat setting that gently dries the hair to minimize damage. This function is suitable for all hair types, but especially for fine, dry or damaged hair. It's a perfect setting for the hot summer season!

## Even Heat Distribution

The Even Heat Distribution technology provides maximum protection for your hair from overheating and thus helps to keep it healthy-looking and shiny.

## Ceramic coated brushes

The brushes have a ceramic coating, to prevent overdrying. It helps spread the heat more evenly and avoids hot spots on the hair, which lead to overheating and overdrying of the hair.

## Three flexible settings

The speed and heat required can be easily adjusted to create the perfect result. Three flexible settings ensure precise and tailored styling.

## Volumizer

The unique and innovative volumizer allow you to create volume just where you want it - at the roots.

## Paddle straightening brush

With the innovative paddle straightening brush you can create beautiful naturally straight looking hair, without causing any damage to the hair.
