Highlights

Easy to empty dust container

The dust container is perfectly designed to dispose dust without creating a dust cloud. Thanks to its unique shape and smooth surface, dust is collected at one side of the container and evenly glides into the dust bin.

PowerCyclone 4 Technology

PowerCyclone 4 technology maximizes airflow and performance by separating dirt from air in one go. It delivers remarkable cleaning results through highly efficient steps: 1) Air enters fast into the PowerCyclone thanks to the straight and smooth air inlet. 2) The curved airpass quickly accelerates the air upwards in the cyclonic chamber to separate the dust from the air.

EPA filter system

The pleated EPA filter has a large filter surface and good filtration performance. In combination with the cyclonic airflow, this prevents it from clogging fast and gives you better and longer-lasting filtration results.

2000 Watt motor

The 2000 Watt motor generates max. 370 Watt suction power for high performance.

Extra long ergonomic grip

This ergonomically shaped grip is convenient in use. Its extra long design gives you farther reach, so you can easily clean hard to reach places.
