Cool Shot

A must-have professional function for hair stylers. The Cool Shot button provides an intense burst of cold air. It is used after styling to finish and set the style.

Narrow concentrator

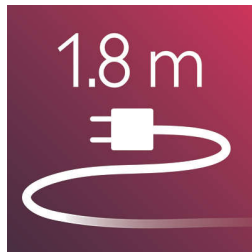

The concentrator works by focusing the flow of air through the opening onto specific areas. This results in precise styling and is great for touch-ups or to finish a style.

Easy storage hook

The rubberised hook is located at the base of the handle and provides another storage option, particularly convenient for use in the home or when staying at a hotel.
