- 9 mm concentrator for focused airflow, great for styling

# Fast drying experience

- · Fast drying, powerful AC motor
- 2200 W of fast, high-performance drying power

Pro Hairdryer BHD274/00

# Highlights

#### **Powerful AC motor**

Philips Pro hairdryer has a high performance AC motor developed for the professional market. It generates up to 130 km/h $^*$  of air speed for fast and effective results.

### 2200 W of power

This 2200 W Pro hairdryer creates a powerful airflow. The resulting combination of power and speed makes your drying and styling experience quicker and easier.

# ThermoProtect temperature

The ThermoProtect temperature setting provides the optimal drying temperature and gives additional protection from overheating

the hair. With the same powerful airflow, you will get the best results while caring for your hair

# 2 x more ions\*\*

Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is smooth, frizz-free hair with vibrant shine. Ionic care comes from an advanced ioniser that releases two times more ions\*\* compared to a standard ioniser, enabling every strand of hair to be cared for from all angles.

### **Cool Shot**

A must-have professional function, the Cool Shot button provides an intense burst of cold air. It is used after styling to finish and set the style.

#### **Accurate control**

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure optimal control for precise and tailored styling.

#### 9 mm narrow concentrator

The 9 mm opening of the concentrator focuses the flow of air for precision styling on specific areas. The ideal attachment for brushing while drying and styling.

#### **Volume diffuser**

The volume diffuser spreads the flow of air across the hair, boosting volume and reducing frizz while drying. For best results, hold the diffuser close to the crown and root area. The diffuser's fine textured pins will add volume, maximise thickness and bounce and help to shape curls.

# Specifications

# **Technical specifications**

Voltage: 220 V Cord length: 2 m Power: 2200 W Frequency: 50–60 Hz Wattage: 2200 W

Motor: AC

Colour/Finish: Black and Violet Drying speed: up to 130 km/h\*

#### **Features**
