

PHILIPS

Hairdryer

ProCare

HP8260/03

More protection for healthy, shiny hair

The Philips ProCare hairdryer protects the hair from overheating with advanced EHD™ technology. The specially designed air outlet spreads the heat gently onto the hair and avoids damaging temperatures on the hair and scalp.

Easy to use

- Six flexible speed and temperature settings for full control
- Avoid hair trapping with the removable filter

Beautifully styled hair

- Cool Shot sets your style
- Perfect styling results with a slim styling nozzle
- Volume diffuser enhances volume, for curls and bouncy styles

Less Hair Damage

- Less overheating with Even Heat Distribution technology
- More Care with ion conditioning for shiny, frizz-free hair
- More Care with ceramic elements, providing far-infrared heat
- Best drying temperature with ThermoProtect temperature

Highlights

Advanced EHD technology

Advanced Philips EHD technology means that your dryer uses a uniquely designed air outlet to ensure heat is always distributed very evenly - even at high temperatures - and prevents damaging hot spots. This gives ultimate protection to the hair from overheating and thus helps to keep your hair healthy and shiny.

ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results, whilst being kind to your hair.

Ionic Care

Ionic conditioning enables anti-static drying. Charged negative ions eliminate static hair, condition the hair and smooth down the hair

cuticles to intensify the hair's shine and glossiness. The result is smooth and frizz-free hair that shines beautifully.

More care with Ceramic element

The ceramic element issues far-infrared heat, which has a gentle warmth that helps dry your hair from within and protects it from overdrying, without compromising on speed and effectiveness.

Slim styling nozzle

Perfect styling results and a shiny, polished look with a slim styling nozzle for precise styling.

Volume diffuser

The volume diffuser dries hair healthily, reduces frizz and increases volume by spreading the airflow across the hair. It adds lift

and maximises volume, especially when used on the crown and root area, making it perfect for creating curls and bouncy styles

Cool Shot

A must-have professional function for hair stylists. The Cool Shot button provides an intense burst of cold air. It is used after styling to finish and set the style.

Removable air filter

The filter of this hairdryer at the back of the dryer can be removed for cleaning. It also keeps hair from being trapped in the dryer. Remove and clean regularly to prevent build-up.

Six flexible speed and temperature settings

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure full control for precise and tailored styling.
