- Sterilise in 3 minutes for convenient sterilisation

Comfortable, soft and silky teat

- Nipple made of 100% food-grade silicone
- Natural oral development

Quality assured

- Designed and produced in the Netherlands

Highlights

Soft, flexible shield

Baby's skin needs extra care. Our shield technology lets this soother follow the natural curves of your baby's face. Your little one will experience fewer skin marks and less irritation on their cheeks.

Rounded shield

Our rounded shield minimises pressure on babies' cheeks for extra gentleness to the skin.

Nipple made of 100% silicone

We consciously chose silicone material for our ultra soft and ultra air nipples, since it's a safe and inert material, widely used in medical applications, free from hazardous chemicals, endocrine active substances (e.g. BPA) and allergens.

Orthodontic teat

Our orthodontic, symmetrical soft silicone nipples are designed for natural oral development.

Sterilise in 3 minutes

The travel case that comes with our ultra soft and ultra air soothers doubles as a steriliser. All you need to do is add some water and pop it in the microwave. Then rest easy that it's clean for the next use.

Produced in the Netherlands

Our ultra soft and ultra air soothers are designed and produced in the Netherlands.
