- Easy storage hook for convenient storage

Beautifully styled hair

- Six flexible speed and temperature settings for full control
- Professional 2100 W for perfect salon results

Less Hair Damage

- Ion conditioning for shiny, frizz-free hair
- EHD+ technology for more protection and shinier results

Long-lasting styles

- Cool Shot sets your style

Time saving

- TurboBoost lets you dry faster without additional heat

Highlights

Professional 2100 W

This 2100 W professional hairdryer creates a powerful airflow. The resulting combination of power and speed makes drying and styling your hair quicker and easier.

Six flexible speed and temperature settings

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure full control for precise and tailored styling.

EHD+ technology

Advanced Philips EHD+ technology means that your dryer will always distribute the heat very evenly – even at high temperatures, and prevents damaging hot spots. This gives added protection and thus helps to keep your hair healthy and shiny.

Ion conditioning

Give your hair an instant boost with ionic conditioning. Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is beautifully shiny, smooth and frizz-free.

TurboBoost

The special TurboBoost feature has been designed to quickly dry yet protect the hair by providing powerful drying without the need for increased temperature.

Cool Shot

A must-have professional function for hair stylists. The Cool Shot button provides an intense burst of cold air. It is used after styling to finish and set the style.

Easy storage hook

The rubberised hook is located at the base of the handle and provides another storage option, particularly convenient for use in the home or when staying at a hotel.

3 m cord

The longer length results in improved flexibility and ease of handling, so you can use it anywhere you want.

Removable air inlet grill

The air inlet grill of this hairdryer can be removed for cleaning. Remove and clean regularly to prevent build-up.
