- Six flexible speed and temperature settings for full control
- Professional 2500 W for perfect salon results

#### Less Hair Damage

- Ion conditioning for shiny, frizz-free hair
- EHD+ technology for more protection and shinier results

# PHILIPS

# Highlights

## Professional 2500 W

This top of the range 2500 W professional hairdryer creates a very powerful airflow. The resulting combination of high power and top speed makes drying and styling your hair much quicker and easier.

## Six flexible speed and temperature settings

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure full control for precise and tailored styling.

## Narrow concentrator

The concentrator of the hair dryer works by focusing the flow of air through the opening onto specific areas. This results in precise styling and is great for touch-ups or to finish a hair style.

## EHD+ technology

Advanced Philips EHD+ technology means that your dryer will always distribute the heat very evenly - even at high temperatures, and prevents damaging hot spots. This gives added protection and thus helps to keep your hair healthy and shiny.

## Ion conditioning

Give your hair an instant boost with ionic conditioning. Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is beautifully shiny, smooth and frizz-free.

## Easy storage hook

The rubberised hook is located at the base of the handle and provides another storage option, particularly convenient for use in the home or when staying at a hotel.

## Removable air inlet grill

The air inlet grill of this hairdryer can be removed for cleaning. Remove and clean regularly to prevent build-up.
